

Why search the world for your custom parts, and tooling, when you can source them all right here

[Make It Global.](#)

Let us quote your project to supply your custom parts. Fast, high quality and the lowest prices

Or let us help you find a supplier in the country or region you want.

#### [3D Printed and Advance Manufactured Parts](#)

Plastic prototypes and parts SLA, SLS, FDM,

Metal parts. Aluminum, Steel, Cobalt Chrome, Titanium, Inconel, Maraging Steel

#### [Plastic Injection molded parts and mold tooling](#)

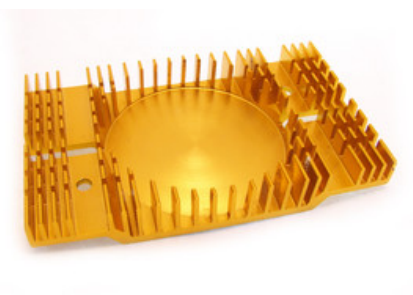

Molded parts.

Full range from small, tight tolerance parts to large industrial parts.

Mold tooling.

Supply of mold tooling for you run.

Prototype molds, bridge tooling, and full production molds

Precision machined parts

Plastics and Metals – Wide range of materials  
CNC -3 - 4 and 5 axis, Turning and milling  
Prototype, Batch and high volume production

Metal Die Casting

High quality, low volume and full production  
Die casting.  
Secondary operations – machining and painting.  
Materials include Aluminum, Zinc and  
Magnesium

Other processes and parts

For Plastic parts - Compression molding,  
Rotational molding, Blow molding,  
Thermoforming.  
For metal parts - Sheet metal fabrication,  
Stamping, Metal Injection molding, Forging,  
Springs and wire work.  
Jig and Fixtures.  
Carbon Composite and Ceramic parts
